## Speedy

The superlight SPEEDY crane is the result of know how achieved in 20 years experience in the construction of light weight flight equipment. The SPEEDY is a further development of the well known ABC Standard crane – 6 m (19.69 ft) long. Thanks to a very light Aluminium-Titan alloy and an extremely functional design it is possible to use the crane in the most difficult to reach places on earth. Due to quick releases and a user friendly press-button system it is possible to mount the crane in less than 10 minutes. All parts are connected together so that it is impossible to loose them after shooting.

The crane is packed in a special carrying case with shoulder straps for extremely comfortable transport. The dimension of the case are only: 160 x 30 x 20 cm (62.99 x 11.81 x 7.87 in), allowing it to fit in station wagon cars. The soft-case which is well upholstered for maximum protection of the crane during transport offers enough space for the crane and other additional equipment (e.g. extension tubes to 9 m / 29.53 ft).

In prolonged version the crane will reach a total length of 9 m (29.53 ft) with a ridge of 7,60 m (0 to 24.93 ft) allowing very impressive shots.

Possible crane lengths	ridges	max. camera weigh
3,00 m / 9.84 ft	0-3,20 m / 0-10.50 ft	13 kg / 28.66 lb
4,50 m / 14.76 ft	0-4,30 m / 0-14.11 ft	13 kg / 28.66 lb
6,00 m / 19.69 ft	0-5,40 m / 0-17.72 ft	13 kg / 28.66 lb
9,00 m / 29.53 ft	0-7,60 m / 0-24.93 ft	10 kg / 22.05 lb

all ridges are considered using a standard tripod 1,50 m (4.92 ft) high

*Simple rope connection at the pipe*

## Versatility: Use your own tripod!

The SPEEDY comes with a flat tripod head you may fit on most tripods up to 150 mm (5.91 inch bowl) diameter. We advise you to use a strong tripod with legs you can fix firmly. **Are you unsure of your tripod? If so please give us a call!** ABC has a tripod especially made for safe use of the crane.

## Preselectable automatic: Camera tilt or fixed position!

Thanks to an ingenious cable system you can preselect the position of the camera with a fixed angle to the ground or an automatic tilt during lift. You are able to select the angle of the tilt and also the starting position of the tilt with no effort at all thanks to a special lever incorporated in the special tripod head which comes with the crane. There are no sensitive electric parts, the crane can be used in all situations no matter what the weather conditions are.

*Crane support stand with altering lever*

Liable to technical changes without notice

### Technical details:

- Crane weight: 15 kg (33.07 lb)
- Length standard version: 6 m (16.69 ft)
- Length extendend sersion: 9 m (29.53 ft) (optional available)
- Ridge: standard 5,40 m (17.72 ft), extended 7,60 m (24.93 ft)
- Size packed: 160 x 30 x 20 cm (62.99 x 11.81 x 7.87 in)
- Max. camera weight: see table in the text

### Optional accessories:

- Extension package up to 9 m (29.53 ft)
- Counterweights

### About ABC ...

ABC Products has been active in studying solutions for the moving camera technique for many years. The main emphasis of the innovative developments is on-consistent lightweight construction at high functionality and longevity: Broadcast equipment for the everyday use on the set.

Including:

**Camera balance systems** (HandyMan) hand-operated or body supported for different camera weights. **Light Cranes** with different lengths, from the consumer up to the professional device with remote Head. **Light Dolly** with track system and **ABC Spirit Light**, a light system in a protective case.

ABC Products also carries out special solutions besides an extensive list of accessories which have all one in common:

### Filming with the moving camera!
