# Marshall \_\_\_\_

## Broadcast A/V Division

# CV-MICRO-JYSTK Instructions

Quite simply - the simplest joystick ever!

All functions are controlled with the CV-MICRO-JYSTK in three modes:

- 1. Pan & Tilt
- 2. Zoom & Focus
- 3. Menu Scroll & select

The modes are changed with the touch-down switch on the joystick. You can either *tap* the switch or *hold down* the switch.

A *tap* is less than 0.5 second A *hold* down is more than 0.5 second

The joystick powers up in **Pan & Tilt** mode. To toggle between **Pan & Tilt** mode and **Zoom & Focus** mode, just *tap* the joystick switch.

To enter Menu, Scroll mode, *hold down* the joystick switch. Then use the joystick to navigate the menu.

To exit Menu, Scroll mode, hold down the joystick switch.

#### Connections.

DC jack: 12 - 35v

XLR4: on a flying lead. This has both power & data for a remote head.

There is a connector on the PCB inside which can be used to connect a **Remote Camera Panel** or other equipment into the system. When data is being received the LED will flash.

**Note:** Not all functions apply to all camera models. Check camera specification for applicable functions.

### **Function List**

#### **Home Menu**

Pan & Tilt Control

Tap

#### **Zoom Focus Menu**

Zoom & Focus
